

§ 993.54

irrespective of whether the estimated season average price for prunes is in excess of the parity level specified in section 2(1) of the act.

[46 FR 61637, Dec. 18, 1981]

RESERVE CONTROL

SOURCE: 30 FR 9799, Aug. 8, 1965, unless otherwise noted.

§ 993.54 Establishment of salable and reserve percentages.

Whenever the Secretary finds, from the recommendations and supporting information supplied by the committee, or from any other available information, that to establish the percentages of prunes for any crop year which shall be salable prunes and reserve prunes, respectively, or to modify the previously established percentages, would tend to effectuate the declared policy of the act, he shall establish or modify such percentages. The salable and reserve percentages when applied to the natural condition weight of prunes, excluding the quantity of undersized prunes determined pursuant to § 993.49(c), received during the crop year by a handler from producers and dehydrators, plus that diverted tonnage (dried weight natural condition prune basis) on diversion certificates issued pursuant to § 993.62 and credited to or held by him, shall determine the weight of each handler's receipts which are salable prunes and reserve prunes. The total of the salable and reserve percentages shall equal 100 percent. A cooperative marketing association may concentrate the prunes of its producer members before applying the salable and reserve percentages.

[30 FR 9799, Aug. 6, 1965, as amended at 37 FR 862, Jan. 20, 1972]

EFFECTIVE DATE NOTE: At 68 FR 40757, July 9, 2003, § 993.54 was suspended, effective Aug. 1, 2003, through July 31, 2008.

§ 993.55 Application of salable and reserve percentages after end of crop year.

The salable and reserve percentages established for any crop year shall remain in effect after that crop year until salable and reserve percentages are established for another crop year. After such percentages are established,

7 CFR Ch. IX (1-1-05 Edition)

all reserve obligations shall be adjusted to the newly established percentages.

[46 FR 61637, Dec. 18, 1981]

EFFECTIVE DATE NOTE: At 68 FR 40757, July 9, 2003, § 993.55 was suspended, effective Aug. 1, 2003, through July 31, 2008.

§ 993.56 Reserve obligation.

Whenever salable and reserve percentages are in effect for any crop year, the reserve obligation of a handler shall approximate the average marketable content of the handler's receipts and shall be a weight of natural condition prunes equal to the reserve percentage applied to the natural condition weight of prunes, excluding the quantity of undersized prunes determined pursuant to § 993.49(c), such handler receives during the crop year from producers and dehydrators plus that diverted tonnage (dried weight natural condition prune basis) on diversion certificates credited to or held by him which were issued pursuant to § 993.62. However, if the committee determines the requirement as to setaside reflecting average marketable content of receipts is not essential to achieve program objectives for the crop of a particular season, it may be eliminated for that season by the committee, with the approval of the Secretary. As a prerequisite for making this determination, the committee must find that the resultant setaside procedures assure that the trade demand for manufacturing prunes, as well as prunes for consumption as prunes, will be met. The salable prunes permitted to be disposed of by any handler in accordance with the provisions of this part shall be deemed to be that handler's quota fixed by the Secretary within the meaning of section 8a(5) of the act.

[30 FR 9799, Aug. 8, 1965, as amended at 37 FR 862, Jan. 20, 1972]

EFFECTIVE DATE NOTE: At 68 FR 40757, July 9, 2003, § 993.56 was suspended, effective Aug. 1, 2003, through July 31, 2008.

§ 993.57 Holding requirement and delivery.

Each handler shall at all times, hold, in his possession or under his control, in proper storage for the account of the committee, free and clear of all liens,
